DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 2003-98804, filed on April 2, 2003.

Information Disclosure Statement

The information disclosure statement filed on June 23, 2004, has been fully considered by the Examiner.

Allowable Subject Matter

Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance:

As to claims 1 and 2, the prior art of record, taken alone or in combination, fails to disclose or render obvious a monolithic spectrophotometer formed from an optical waveguide comprising a photoelectric conversion device formed on a separate photoelectric conversion device substrate or an optical element formed on an optical element substrate that is mounted to the optical waveguide of the monolithic spectrophotometer, in combination with the rest of the limitations of claims 1 and 2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Pertinent Prior Art

The prior art of record and not relied upon is considered pertinent to Applicant's disclosure. The prior art of record is Chen et al. (USPN 6,249,346) and Cohen et al. (USPN 6,657,723).

Chen et al. discloses a monolithic spectrophotometer that is constructed on a waveguide in the form of a silicon substrate comprising an entrance slit means, a concave grating, and a photodiode array formed on a silicon bridge that extends along the span of the waveguide to collect the light dispersing off the grating.

Cohen discloses a spectrograph comprising a substrate with a recess for receiving a slab waveguide with an etched diffraction grating at one end of the slab waveguide and an input light source and detector disposed on top of the substrate capable of receiving light dispersed from the grating of the slab waveguide.

Conclusion

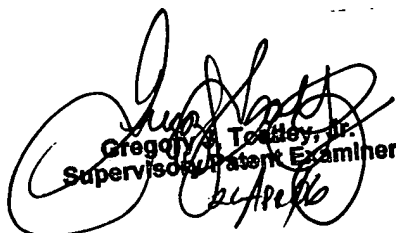

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marissa J. Detschel whose telephone number is 571-272-2716. The examiner can normally be reached on M-F 8:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory J. Toatley, Jr. can be reached on 571-272-2059. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
